# **Acuity® AR 2000 Part Number Guide**

AR2000 – Limited Quantities Available

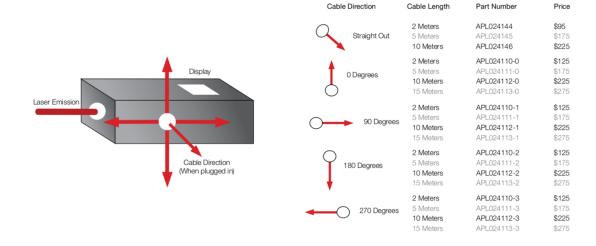

# **AR2000 Ordering Information**

\*This product is being phased out

Part#	Description
	AR2000 Laser Sensors w/o Internal Heater
APL222101	AR2000: Laser Sensor with RS232/422/485 Outputs
	AR2000 Laser Sensors w/ Internal Heater
APL222141	AR2000: Laser Sensor with RS232/422/485, Outputs
	AR2000 Interface Cables
	SEE DIAGRAM BELOW
	AR2000 PROFIBUS Cables
APL024160	AR2000 PROFIBUS-Out Cable, 5m
	AR2000 Connectivity Kits
AQ7000001	Connectivity Kit – US Plug
AQ7000002	Connectivity Kit – EU Plug
AQ7000005	Connectivity Kit – US Plug (serial to USB)
AQ7000006	Connectivity Kit – EU Plug (serial to USB)
	AR2000 Touch Panel Display
AQ9900007	Touch Panel Display – 7" Screen, Linux
	AR2000 Miscellaneous Parts
AQ2508112	AR2000 Cooling Enclosure
APL025012	AR2000 Sunscreen

<sup>\*</sup>See page 2 for ordering descriptions, if needed.

# AR2000 Cable Part Numbers & Orientation

### Acuity® AR 2000 Part Number Guide

### Accessory Ordering Guide

Connectivity Kits: Acuity sells a connectivity kit to aid in connecting your laser to a power supply and serial port. This product includes a 120V, 15 VDC, AC power supply; a serial cable with DB9 connector; and a solid-state, NEMA-4X interface box. The interface box includes two sets of terminal blocks for simple input (from sensor) and output (to your selected device), a DB9 male serial connector out, and a barrel style power connector in. You can either pass through the wiring to another unterminated cable, connect a DB9 serial cable directly to the interface box, or both at the same time.

**AQ7000001 -** 120 V version with an US-style plug **AQ7000002 -** 240 V version with a European-style plug

**AQ7000005** – w/ serial to USB cable for ease of connection into industrial computers - US plug **AQ7000006** – w/ serial to USB cable for ease of connection into industrial computers - Euro plug

Touch Panel Display: Stand-alone terminal interface for use with Acuity laser distance sensors. These fully enclosed units replace panel meters, alphanumeric displays, and analog controllers by providing a modern interface through a full-color LCD and touch screen. The Touch Panel Display communicates with one or two Acuity sensors using RS-232 serial interfaces. The touch panel can be easily configured using on-screen buttons to display, scale, and even graph the sensors' distance outputs. Relative dimensions can be measured using a tare function. With two Acuity sensors, the touch panel can serve as a thickness gauge. Limits can be programmed into the touch panel to give a visual warning to operators that the target is too close or too far or too thick or too thin. With a USB flash drive, measurements can be logged and saved for further analysis.
